ROBERT E. HUBBARD  
Burlington, CT

“FREEDOM”  
(78”H X 36”W X 52”D)

My sculpture “Freedom” was inspired by my love of ecology and country. Utilizing the environment as a muse I created this eagle whose 8-foot wingspan is made of recycled materials such as used oil drums, reinforced iron and pipe.

I believe that the eagle, America’s “National Symbol,” was able to rise from the brink of extinction because of a cooperative effort of the government and Man.

I have created this sculpture as my homage to this majestic creature.
